

QUICK MM-RAG TEST DOCUMENT

=====

This small PDF is designed for fast parsing and indexing with the local Ollama RAG application.

PROJECT SUMMARY

The application extracts document text and tables, creates embeddings with the local nomic-embed-text model, stores them in Qdrant Cloud, and answers questions using the local llava model.

KEY FACTS

Application type: Multimodal PDF question answering

Embedding model: nomic-embed-text

Vector database: Qdrant Cloud

Chat model: llava:latest

SUGGESTED TEST QUESTIONS

1. What embedding model does this application use?
2. Which vector database stores the document chunks?
3. What is the purpose of this application?
